the last years, library interior designers have introduced strong
r into schemes, not only on soft furnishings but on bookcases
bookshelves, moving away from the traditional wood nishes that
tributed to an atmosphere of formality. These days the importance
reading for pleasure is not only recognised but celebrated and
rary services are re ecting this with a new con dence in dynamic
nd buzzing spaces. Finding a balance between creating a vibrant
colour scheme with broad appeal but which will not feel dated two
years down the line is important. At Opening the Book we
our theory to create schemes that are appropria-
currently on trend.

Don´t keep calm because calm is boring

We bring creativity and attention to detail to all our interior schemes,
creating designer nishes by using budget-friendly carpets and fabrics
adding lamps, cushions and rugs for a luxurious feel.
As libraries strive towards creating environments that not only provid
all the elements expected of a 21st century service but also positio
themselves as the heart of the cultural life of a community, school
college, it has become more important than ever to make space f
people to rest and re ect in comfort, alongside the bookcases,
and study desks.

Colour is an extremely personal and emotional thing; everyone has a favourite and/or a colour they detest – and they won't be shy about expressing their opinion. The role of the interior scheme as a marketing tool, therefore, can be invaluable in overcoming personal prejudice to build towards an agreed scheme that embodies the va-
and intentions of the library service as a whole.
